RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Office Action mailed January 29, 2002, concerning the Examiner's restriction to the claims for the subject application, Applicant hereby provisionally elects, with traverse, Invention I (claims 1-15 and 17-22), drawn to a targeting construct, a method of producing a targeting construct, a non-human transgenic animal, a transgenic mouse comprising a disruption in a tryptase gene, and a method of identifying an agent that modulates the expression and/or function of tryptase, a transgenic mouse with decreased body weight and decreased thymus weight, and a method of identifying an agent that ameliorates a phenotype associated with a disruption in a tryptase gene.

In the restriction, the Examiner asserts that the inventions are distinct from each other because Invention I (claims 1-15 and 17-22) is drawn to a non-human transgenic animal and/or a transgenic mouse comprising a disruption in a tryptase gene and a method of identifying an agent that modulates the expression and/or function of tryptase, a transgenic mouse with decreased body weight and decreased thymus weight, and a method of identifying an agent that ameliorates a phenotype associated with a disruption in a tryptase gene; and Invention II (claims 16 and 23), is drawn to an agent that modulates expression of tryptase gene disruption-associated phenotype of a transgenic mouse.

Specifically, the Examiner asserts that the claims of Invention I and Invention II are patentably distinct in that the claims of Invention I involve procedures that are materially different from the claims of Invention II. In particular, the Examiner asserts that the agent of Invention II is related to the methods of Invention I as a product by process. The Applicant disagrees with the Examiner's conclusion in that the agent recited in the claim of Invention II is related to the compositions and methods recited in the claims of Invention I. A search and examination of these claims, therefore, can be made without serious burden to the Examiner.

Although the Applicant has provisionally elected Invention I for the purposes of advancing prosecution of the present application, Applicant contends for the foregoing reasons that the restriction requirement is improper. Accordingly, Applicant respectfully requests reconsideration and withdrawal of the requirement.

Respectfully submitted,
